

IN THE CLAIMS:

Please amend the claims as follows:

Claim 1 (Currently Amended): An awning construction for a camping accommodation ~~or the like~~, the awning construction comprising ~~a roof and at least one side wall~~, characterized by

a container ~~which is mountable on a wall of a~~ the camping accommodation, ~~which is arranged to include~~ the container including, in a closed position of rest, at least ~~the~~ tent cloth of an awning, ~~wherein~~

the awning having a substantially horizontal part and at least one substantially vertical part, said at least one substantially vertical part being connected to said horizontal part,

the container having a substantially horizontal section and at least one substantially vertical section, said at least substantially vertical section being connected to one end of said horizontal section,

said horizontal section receiving said horizontal part and said at least one vertical section receiving said at least one vertical part,

means for holding an edge of the tent cloth of the awning being provided in both said horizontal section and said at least one vertical section, and ~~the container~~

~~comprises, in mounted condition, a substantially horizontal and at least one substantially vertical section, which the container further has having an open position to take for taking the awning out of the container and put it up and wherein the container is further provided with fixing means for an edge of the tent cloth of the awning, located, in the operative position, in the container erecting the awning.~~

Claim 2 (Currently Amended): ~~An~~ The awning construction according to claim 1, ~~characterized in that~~ wherein the container is arranged to include at least a part of a frame of the awning.

Claim 3 (Currently Amended): ~~An~~ The awning construction according to claim 1, ~~characterized in that~~ wherein the awning ~~comprises~~ includes an inverted U-shaped tent frame and that the container has a corresponding shape with a horizontal section and two vertical sections at the ends thereof.

Claim 4 (Currently Amended): ~~An~~ The awning construction according to claim 3, ~~characterized in that the~~ wherein legs of the tent frame are fixed at ~~the~~ downwardly turned free ends via hinges to the camping accommodation.

Claim 5 (Currently Amended): ~~An~~ The awning construction according to claim 3, ~~characterized in that the~~ wherein legs of the tent frame are detachable at ~~the~~ downwardly turned free ends.

Claim 6 (Currently Amended): ~~An~~ The awning construction according to claim 1, ~~characterized in that the~~ wherein a frame of the awning comprises includes a number of telescopic support tubes.

Claim 7 (Withdrawn): An awning construction according to claim 1, characterized in that the frame of the awning comprises a number of pivotable and/or slidable tension poles which, in operation, extend between the container and other frame parts and which cooperate with those other frame parts to tension the tent cloth.

Claim 8 (Withdrawn): An awning construction according to claim 3, characterized in that the awning comprises a support bracket for at least the side walls.

Claim 9 (Withdrawn): An awning construction according to claim 1, characterized in that the container, near the lower ends of the vertical section(s), contains a tent tube which can be put out downwards.

Claim 10 (Withdrawn): An awning construction according to claim 6, characterized in that at least a number of tension poles are fixed at the ends remote from the container to a slide bush which is provided around a support tube of the tent frame and is slidable along that support tube to bring the support tube in such a position that the tent cloth is tensioned.

Claim 11 (Currently Amended): ~~An~~ The awning construction according to claim 1, ~~characterized in that~~ wherein the fixing means for the tent cloth ~~comprise~~ includes a caravan profile provided in the container, ~~which can cooperate~~ and cooperates with a beading along ~~the~~ an edge of the tent cloth.

Claim 12 (Cancelled)

Claim 13 (Cancelled)

Claim 14 (Currently Amended): ~~An~~ The awning construction according to claim 12, ~~characterized in that~~ the first and second closing means ~~comprise~~ include one of tension rubbers; and a tension cord ~~or the like~~ and hook-shaped elements for cooperation therewith.

Claim 15 (Currently Amended): ~~An~~ The awning construction according to claim 1, ~~characterized in that~~ wherein the container has a baseplate fixable to a wall of a camping accommodation with edges bent forwards and partly towards each other, as well as a lid of hard waterproof material hingedly wed to one of the edges, which ~~can~~ be ~~is~~ fixed to ~~the other~~ another edge using closing means to form a closed box.

Claim 16 (Currently Amended): ~~An~~ The awning construction according to claim 1, ~~characterized in that~~ wherein the container substantially consists of detachable holding means in ~~the~~ a shape of hooks ~~or the like~~ fixed to the wall of the camping accommodation and one of tension cords; and tension rubbers ~~or the like~~ cooperating therewith.

Claim 17 (Withdrawn): An awning construction according to claim 1, characterized in that the container comprises a number of flaps of flexible or semi-flexible material provided along the side wall(s) and the roof of the camping accommodation as well as securing means for those flaps.

Claim 18 (Withdrawn): An awning construction according to claim 1, characterized in that the container is arranged to be fixed on a caravan rail.

Claim 19 (Withdrawn): An awning construction according to claim 1 characterized by roll-up aids.

Claim 20 (Withdrawn): An awning construction according to claim 19, characterized in that the roll-up aids comprise a flexible tube, hose, rod or the like provided along the front edges of the roof and the side wall(s).

Claim 21 (Withdrawn): An awning construction according to claim 1, characterized in that operating means are provided for putting up and putting away the awning, which operating means comprise a drivable roll.

Claim 22 (Withdrawn): An awning construction according to claim 21, characterized in that the drivable roll is connected to a front edge of the awning via pull cords or the like.

Claim 23 (Withdrawn): An awning construction according to claim 22, characterized in that the front edge is formed by the lower edge of a front wall.

Claim 24 (Withdrawn): An awning construction according to claim 21, characterized by frame parts being under spring tension in the operative position, which can be brought into the position of rest against the spring tension.

Claim 25 (Withdrawn): An awning construction according to claim 21, characterized in that the drivable roll has an inverted U-shape, wherein the roll is flexible at least at the corners of the U-shape.

Claim 26 (Withdrawn): An awning construction according to claim 25, characterized in that the roll is at least partly provided in a tubular housing, which is provided with a passage slot for the tent cloth and which is fixed to the wall of the camping accommodation.

Claim 27 (Withdrawn): An awning construction according to claim 25 and further comprising roll-up aids including a flexible tube, hose, rod or the like provided along the front edges of the roof and the side wall(s).

Claim 28 (Withdrawn): An awning construction according to claim 21, characterized by driving means which are operable manually and/or using a motor or a spring which cooperate with the drivable roll.

Claim 29 (Withdrawn): An awning construction according to claim 1, characterized in that the container comprises a lower horizontal section for including a ground skirt.

Claim 30 (New) An awning construction for a camping accommodation, the awning construction comprising

a container mountable on a wall of the camping accommodation, the container including, in a closed position of rest, at least tent cloth of an awning, and the container including a substantially horizontal and at least one substantially vertical section, the container having an open position for taking the awning out of the container and erecting the awning and the container further including fixing means for an edge of the tent cloth of the awning, located in the container,

the container including a baseplate fixable to a wall of the camping accommodation and a cover made of flexible weather-resistant material connected to the baseplate and having two free edges on both sides of the baseplate, one of the two

free edges being provided with first closing means for cooperating with second closing means on the other of the two free edges.

Claim 31 (New) An awning construction for a camping accommodation, the awning construction comprising

a container mountable on a wall of the camping accommodation, the container including, in a closed position of rest, at least tent cloth of an awning, and the container including a substantially horizontal and at least one substantially vertical section, the container having an open position for taking the awning out of the container and erecting the awning and the container further including fixing means for an edge of the tent cloth of the awning, located in the container,

the container having a baseplate fixable to a wall of the camping accommodation with edges bent forwards from the wall, one of the edges being provided with second closing means and from the other of the edges, a strip of flexible waterproof material with a free edge extends, which is provided with first closing means for cooperating with a second closing means.
